

Foes!

Apple Maggot AND Codling Moth

Apple Maggot

Which
Foe do
I have?

Codling Moth

Whether it is a fly or a moth, the backyard gardener does **NOT** need to use pesticides – organic or not!

Seattle Tree Fruit Society has a great explanation on how to apply barriers for pests. And you can:

Kootenay Cover

Sock Baggie

- Bag your apples when you thin them.
- Pick up and destroy apples that have dropped to the ground.
- Or cover the tree with a Kootenay Cover.
